請依下文回答第 14 題至第 17 題:

During my high school years my best friend was Susan Miller, a girl who had lived down the street from me all her life. We knew each other well and had many interests in common. One way in which we were different, however, was in our shopping habits. When I shopped, I always knew what I wanted, got it quickly, and left. For Susan, shopping was a game. She spent all day at it: examining, comparing, and finally, if conditions were right, buying. All too often I have spent hours waiting for her to make up her mind. In fact, my longest "shopathon" was on a Christmas Eve when Susan and I went to pick up a few last-minute gifts. She wanted a fit for her father, and I had to get something for my youngest sister, Sara. We started at 9:00 A.M., and by 10:15 I had bought Sara her gift, a toy Dalmatian. Then I just trudged around the mall after Susan. By one o'clock she still had not made a purchase, and the mall was becoming human gridlock. Finally feeling some compassion, Susan bought herself and me each a slice of pizza. We had to eat standing up; the tables were all filled. Then, walking and walking through endless stores, we continued shopping. She examined shirts, scarves, ties, knickknacks. Her response to every possibility was negative: her father had it, he wouldn't like it, this was too expensive, and that was too cheap. Nothing seemed right for Susan's father. Finally, fifteen minutes before the mall was scheduled to close, she came out of a store in triumph. "I got it!"she said. I looked up from where I was sitting on a bench, rubbing my swollen feet. "What?" I asked weakly. She held up a piece of paper. "A gift certificate!"she exclaimed. "With this my father can get whatever he wants."

Pablo Picasso was born on October 25, 1881 to Don José Ruiz Blasco and Doña Maria Picasso Lopez. Pablo 31 the first ten years of his life in Malaga, Spain. The family was far from rich, and when two other children were born, 32 was often difficult to make ends meet. When Don José has offered a better-paid job, he accepted it 33, and the Picassos moved to the provincial capital of La Coruna, where they lived for the next four years. In 1892, Pablo entered the School of Fine Arts, but it was mostly his father who taught him painting. By 1894 Pablo's works were so well executed for a boy of his age that his father, recognizing Pablo's amazing 34, decided to hand his brush and palette to his son and declared that he would never paint again.

請依下文回答第35題至第37題:

By the 18th century Paris had replaced Rome as the artistic center of Europe. At the French court of Louis XV a new rococo style developed. The term "rococo" comes from the French word rocaille (rock-work). Like the terms "gothic" and "baroque," it was a term of contempt—a departure from the classical conception of art. The rococo style is sometimes called the Louis XV style.

The rococo style developed out of the late baroque. It was more delicate and relaxed than the baroque. It was also on a smaller scale, marked by curves and countercurves. Principally a decorative art, it expressed itself in interior architecture and design, painting, furniture, porcelain, and landscape gardening. It was first used to decorate the palaces and salons of the French aristocracy but later spread to the southern German states and Austria.

The rococo style, then, was closely connected to the joyful, frivolous age of Louis XV. It aimed at delicacy and perfection of proportion. Small in scale, it had a graceful feminine character. It represented the elegance and luxury of the period.

- 35 According to this passage, which of the following statements is NOT true?
 - (A) The term "rococo" is a French word, meaning rock-work.
 - (B) Baroque style grew out of the rococo style.
 - (C) The term "rococo" referred to an art form which was considered inferior to the classical forms of art.
 - (D) The rococo style represented the elegance and luxury of the reign of Louis XV.
- According to this passage, what did the rococo style and the baroque style have in common?
 - (A) Neither was considered the Louis XV style.
 - (B) Both were large in scale and aimed at delicacy and elegance.
 - (C) Both were viewed as different from the classical conception of art.
 - (D) Both developed out of the gothic style.
 - According to this passage, how did the rococo style express itself as a decorative art?
 - (A) It was used to decorate the houses of the ordinary people.
 - (B) It originated from the southern German states and Austria.
 - (C) It was used to portray the beauty of women.
 - (D) It was used to decorate the palaces and salons of the French aristocracy.

請依下文回答第38題至第41題:

Our fascination with eating and drinking behaviors and their causes has resulted in a huge industry of food-related pop science. Every bookstore, every magazine stand, every grocery store checkout counter is filled with publications about how to get your child to eat vegetables, how to tell if someone has an eating disorder or, most commonly, how to lose weight. But the degree to which any of these is based on scientific research is very limited. In contrast to the literature for the general reader, the scientific research on eating and drinking behaviors is usually too technical for the general reader. The Psychology of Eating and Drinking is a unique volume, a textbook that can be comprehended by the general educated reader. Just as in her previous books, Alexandra Logue grounds her investigation into the complex interactions between our physiology, our surroundings, and our eating and drinking habits in laboratory research and up-to-date scientific information. The chapters move from the general—hunger and thirst, taste and smell, and eating behaviors—to the more specialized—overeating and overdrinking, anorexia and bulimia, and alcohol use. In each case, Logue provides a brief synopsis of the most historically influential scientific research and then relates this history to the most up to date advances. This method provides the reader with a general introduction to the physiology of sensations related to eating and drinking and how these sensations are influenced by the individual's social surroundings. Thus, this book provides general readers with a biological and psychological framework to understand their eating behaviors.

- 38 What's the purpose of this passage?
 - (A) To arouse the interest of doing research on food science.
 - (B) To call for the attention to healthy life and food choices.
 - (C) To advertise Alexandra Logue's unique way of editing a cook book.
 - (D) To introduce the book The Psychology of Eating and Drinking.
